

Assistive Technology Services

Using Technology to Increase Independence

The LifeScape Assistive Technology Program utilizes highly trained, experienced and creative staff to identify how assistive technology can help you be more independent. Our team will help you learn, use and acquire equipment and devices to achieve your goals.

Creative Solutions Using:

- Wheelchairs to optimize support and mobility for better function.
- Power Wheelchairs adapted to a variety of skill levels and programmed to control environments and other devices.
- Seating to optimize support for improved movement of extremities.
- Computer Access using alternative ways to use computer hardware and software.
- Home automation to control your home environment hands-free and/or automatically.
- Software to make typing, computing, and organizing easier. Remote Controls adapted to allow people with different skills to control devices.
- Communication Devices to supplement limitations in speaking and/or programmed to control environments and other devices.
- Custom Engineered Devices for situations when what you need doesn't exist, we can often design and create devices for your specific needs.
