

Seating & Wheeled Mobility

The right equipment and the right fit – the first time.

The LifeScope Seating & Wheeled Mobility Program utilizes a highly trained and experienced staff of occupational therapists, physical therapists, equipment specialists, and equipment technicians to get the right equipment the first time. We also provide you with the service to keep meeting your needs, even as they change. Experience the LifeScope Advantage.

Experienced, Highly Trained, and Certified Staff

- Over 170 years of combined experience
- More RESNA-certified Seating and Mobility Specialists than any provider in the six-state region
- Continually trained in the latest best practice techniques

State-of-the-Art Evaluation and Training Equipment

- History of your skills, mobility needs, and previous equipment
- Head-to-toe joint, bone, and muscle assessment, as well as body measurements
- Seating simulator to make sure your wheelchair fits and works for you before ordering
- Custom molding to capture and support your exact shape
- Pressure mapping to help prevent and heal pressure ulcers
- A fleet of powered wheelchairs available for evaluation and training
- Extensive alternative driving controls to help nearly anyone drive a power wheelchair independently
